FREEFALL DATA SYSTEMS

SonoAlti 4V speaking skydiving altimeter

SonoAlti 4V allows you to hear your altitude and additional information announced to you during your skydive. This makes it a powerful device for training and developing general altitude awareness. Program the device with your own settings on up to three presets, or use one of the two default settings, which never change. Easy-to-use, always-on design.

Key Features

- Hardcoat-anodized aluminum case
- Set via WebUSB in a web browser
- Audio from a professional voice actress
- Regular spoken altitude announcements
- Unlimited additional notifications
- Add your own sound files
- Can also emit standard beeps and sirens
- Three custom user presets
- Always-on design
- Adjusts automatically to local elevation
- Custom freefall thresholds for wingsuiting
- Landing zone offsets possible
- Long battery life of approximately two months
- Rechargeable lithium polymer battery

Specifications

- Dimensions: 53.1 × 33.4 × 10.6 mm (2.09 × 1.31 × 0.42 in)
- Weight: 32.5 g (1.15 oz)
- Anodizing type: MIL-A-8625 Type III (hardcoat)
- Battery: rechargeable lithium ion 3.7 V 250 mAh
- Peak output volume: 90±3 dBA @ 10 cm
- Audio format: mono 16-bit 44.1 kHz PCM
- Operating temperature range: -40° to 65° C (-40° to 150° F)
- Operating altitude: -500 to 9,000 m MSL (-1,640 to 29,528 ft)
- Altitude resolution: 0.5 m (1.64 ft)
- Sample rate: 50 Hz
- Charging temperature range: 0° to 50° C (32° to 122° F)
- USB connector: USB C
